

Guideline how to connect and link your innovative nutrient recovery technology/product to the NUTRIMAN Farmer Platform.

NUTRIMAN Farmer Platform is a Nitrogen and Phosphorus innovative fertiliser recovery thematic network for summarising, sharing and presenting completed TRL6¹ high research maturity results that are “**ready for practice**“ and “**close to market**” with added values and cost/benefit aspects to farmers but not sufficiently known or used by practitioners. NUTRIMAN is a communication, dissemination and networking support action, compiling knowledge "ready for practice“ and “close to market”, that are post research but prior commercialization or early stage of commercialization status, while fully meet the new EU Fertilising Products Regulation 1009/2019 beyond 2022.

This Farmer Platform is a continuously expanding **free database** that will be evolutionary maintained for long term up to 2031. Connection of the Farmer Platform is free of charge.

NUTRIMAN FARMER PLATFORM URL LINK: <https://nutriman.net/farmer-platform>

This farmer platform showcase innovative Nitrogen/Phosphorus recovery technologies and recovered Nitrogen/Phosphorus fertiliser products that is “ready for practice” or early stage on the market but not sufficiently known or used by practitioners. We will widely publish practical and farmer-oriented information and training materials on innovative technology and bio-based fertiliser product, such as practice abstracts, infosheets, videos and your direct contact information.

Innovative products and technologies will be online published via a harmonised product and technology pages. For more information how to set up a specific and unique technology and product pages please visit the following URL links:

- Recovered Nitrogen/Phosphorus fertiliser **Product pages:** <https://nutriman.net/farmer-platform/product>
- Nitrogen/Phosphorus recovery **Technology pages:** <https://nutriman.net/farmer-platform/technology>

How to prepare your application?

1. Fill in the enclosed technology and/or product **info-sheet template**

The fully filled info sheet using the NUTRIMAN template is a Mandatory element for publication of product/technology on the NUTRIMAN Farmer Platform

If you have an innovative technology which is producing innovative fertiliser product(s), in that case please fill in both the technology info sheet and product info sheet separately. Farmer platform is publishing the technologies and products separately.

Format requirement: editable Word document

2. Please collect the following public technical documents

Please note that separate technical documents are needed for technology and for product.

- At least one high resolution representative pictures showing the product/technology in png or jpg format. - **This is a mandatory element**
- High resolution logo in png or jpg format
- Infographics - This is an optional element, however we are encouraging you to prepare it. Format: pdf or jpg/png
- Video (youtube link) - This is an optional element, however we are encouraging you to prepare it.
- Training material - This is an optional element, however we are encouraging you to prepare it. Format: pdf
- Other supporting documents - This is an optional element, however we are encouraging you to prepare it.

3. Please fill in the enclosed EIP-AGRI abstract template

The fully filled EIP-AGRI abstract template is a mandatory element for publication of product/technology on the NUTRIMAN Farmer Platform

Please note that separate EIP-AGRI abstracts are needed for the technology and for the product.

Important please use the same title for Info Sheet and EIP-AGRI abstract.

Format requirement: editable Word document

4. Please carefully **read the enclosed Information sheet for Voluntary participation in NUTRIMAN Farmer Platform** (enclosed).

Prepare your **signed Consent** (enclosed consent form) for agreement on web publication of the above mentioned technical documents and personal data highlighted in the Info Sheets and other technical documents:

- The first signature on the enclosed Consent form is needed from the Contact person highlighted on the technology/product Infosheet.
- The second signature is needed from the vendor organisation for allowing us that technology/product related documents will be published on the NUTRIMAN Farmer Platform.

Signed Consent form is mandatory element for publication on Farmer Platform.

If you are providing same contact data both for technology and products in that case one common signed consent form is sufficient for your technology and product info sheets.

Format requirement: scanned document in pdf format.

5. Submit your application

Please send a scanned Consent form together with the set of technical documents as of Point 1 through Point 3 and Point 4 legal document to the NUTRIMAN Coordinator e-mail: Edward Someus/Terra Humana Ltd. biochar@3ragrocarbon.com

6. The NUTRIMAN Consortium make a decision on the received application.

The document titled as "**Basic criteria for open publication of innovative N/P recovery technologies/products on the Nutriman Farmer Platform**" is setting up criteria for publication. The applicant will be informed by e-mail on the final decision at least 15 days after receiving comprehensive and corrected documents.

7. Publication of the accepted technologies/products

In the case of acceptance of your technology/product we will prepare and publish your product/technology pages on the NUTRIMAN Farmer Platform based on the received documents.

If you are requesting any modification you can ask it any time by sending an e-mail to the NUTRIMAN Coordinator. Based on the additional/corrective info your product/technology pages will be adjusted.

8. Detailed evaluation

The accepted technologies/products will go to the detailed evaluation phase to select 25 best practices for multi lingal translations. Detailed evaluation will be supported by independent experts (FAB).

NUTRIMAN reserves the right to not publicise and/or link proposed innovative technologies and products which are not in the scope of our work field and the minimum required mandatory technical/legal elements and documentation are missing.
