CARTIF

Pelletized digestate from mixture of pig manure, poultry manure and straw by "MIX-FERTILIZER" process

https://nutriman.net/farmer-platform/product/id_267

KEY PRODUCT FACTS

- Double organic/inorganic base.
- Gradual nitrogen release.
- Pellet presentation.
- Improving soil quality
- Organo-mineral fertilizer
- Minimizing nitrogen losses through leaching of nitrates
- Recovered bionutrients
- Greenhouse gas emissions reduction
- Cost reduction by a single application
- Increase in production yields

HOW TO USE

- Type of farming: conventional.
- Cultivation methods: open field or greenhouse
- Application doses: 300-1,000 kg/ha
- Application frequency: single application

NUTRIENT CONTENT

N 10%

P 4%

K 4%

AREAS OF APPLICATIONS

- Cereals for the production of grain, root crops and plants harvested green from arable land by area

This project has received funding From the European Union's Horizon 2020 research and innovation programme under grant agreement No. 818470
