**Green compost from green waste by “IMOG”  
process key product**

[https://nutriman.net/farmer-platform/product/id\\_280](https://nutriman.net/farmer-platform/product/id_280)

### KEY PRODUCT FACTS

- Produced from selectively retrieved organic waste streams
- Organic soil improver with soil-like texture (particle < 15 mm)
- In EU Fertiliser regulation this **vfg-compost** is a **PFC 3**. Also eligible as Component Material Category (CMC) 3 'Compost'
- Slow release of nutrients
- High organic carbon content: 17-22% (dm)
- Improves soil biodiversity & fertility
- Increases water retention capacity – reduces vulnerability to erosion and droughts
- Free of pathogens, insect larvae and weed seeds
- Sieved and inspected (input/output) on visual contaminants

### HOW TO USE

- Type of farming: organic/bio, low input, conventional
- Cultivation methods: open field, greenhouse
- Application doses: 20-25V t/ha (depending on soil, season, crop, etc.)

### AREAS OF APPLICATIONS

- Recommended crops: potato, wheat, cabbage, pumpkin, cucumber, tomato, leafy vegetables, celery, leek and other crops in agriculture.  
Also use in horticulture, floriculture and arboriculture

**Nutrient content**  
0,9-1,3% K<sub>2</sub>O (dm)  
0,5-0,6% P<sub>2</sub>O<sub>5</sub> (dm)  
1,2-1,6% N (dm)

This project has received funding  
From the European Union's Horizon 2020  
research and innovation programme under  
grant agreement No. 818470
