**PK fertilizer from the ash of poultry manure
with "BMC Moerdijk"
thermal conversation process**

https://nutriman.net/farmer-platform/product/id_401

KEY PRODUCT FACTS

- Inorganic PK fertilizer made from the conversion of poultry ash in a thermochemical process.
- High nutrient content: 10 % P_2O_5 ; 12 % K_2O ; 20 % CaO
- Efficacy tested in pot trails and field experiments under real farming condition
- The product contains useful amounts of secondary nutrients and trace elements
- The product has a low content of contaminants, e.g. heavy metals (Cd, As, Pb), no organic compounds and is free of pathogens
- Available on the market since 2008
- National authorization given for example in GB, Fr, B,

HOW TO USE

- Type of farming: conventional
- Recommended dose: depending on the P,K-nutrient needs of the crop and the P,K-nutrient status of the soil.

Nutrient content
0% N
10% P_2O_5
12% K_2O
20 % CaO
7 % SO_3
5 % MgO

AREAS OF APPLICATIONS

- Arable cultivations

This project has received funding
From the European Union's Horizon 2020
research and innovation programme under
grant agreement No. 818470
