### Organic soil improver from chicken manure by "Eraspo" process

[https://nutriman.net/farmer-platform/product/id\\_452](https://nutriman.net/farmer-platform/product/id_452)

## KEY PRODUCT FACTS

- Organic fertiliser made of composted poultry manure
- Readily absorbed by the soil.
- Stimulates micro-organism activity in the soil.
- Without sand, soil, weed seeds and pathogens.
- Easily spreadable using a manure spreader.
- Produced in compliance with Regulation (EC) 1069/2009 approved composting plant with registration number NL7348 EEC/CEE.
- Complies with NFU 44051 and Regulation EU 2019/1009 as PFC organic fertilizer and PFC soil improver.

## HOW TO USE

- **Type of farming:** organic, low input, conventional.
- **Average dose rate :** 3-5 T/Ha, based on the recommendations of your adviser.
- **Mainly used in farming and horticultural applications.**

### Nutrient content

N : 2%

P : 2%

K : 2%

## AREAS OF APPLICATIONS

- **Cultivation methods:** Open field
- **Recommended crops:** grains, rape, turnip rape, sunflower seeds and soya, Root crops and plants harvested green from arable land by area, fresh vegetables, permanent crops

This project has received funding From the European Union's Horizon 2020 research and innovation programme under grant agreement No. 818470
