

# Nutriman Nutrient Management and Nutrient Recovery Thematic Network

@NUTRIMANnetwork  
www.nutriman.net

**NH<sub>3</sub>-water from pig manure or digestate with VP-Hobe Manure Valorisation system: flotation, belt press sieve, reverse osmosis and stripper**

[https://nutriman.net/farmer-platform/product/id\\_1527](https://nutriman.net/farmer-platform/product/id_1527)

## KEY PRODUCT FACTS

- High N concentration
- Potential RENURE fertilizer
- Can replace chemical fertilizer
- Liquid biobased fertilizer
- Straight liquid inorganic macronutrient fertiliser (PFC 1.C.I.b.i)
- Free from salmonella and E-coli

## HOW TO USE

- Currently max 170 kg N/ha as livestock manure (230-250 kg N/ha for derogation farms in NL).
- This product is a pilot RENURE fertilizer which means that :
  - application will no longer be defined as livestock manure in the Nitrates Directive.
  - application will no longer be limited to 170 kg N/ha.

**Nutrient content N: 14 %**

## AREAS OF APPLICATIONS

- Type of farming: conventional
- Cultivation methods: open field, green house
- Recommended crops: vegetables, grass, maize, grain

*Due to the organic origin of the fertilizer nutrient content may vary*

This project has received funding From the European Union's Horizon 2020 research and innovation programme under grant agreement No. 818470
